MODUL 2,3,4

LANDING PAGE HTML,CSS

Tulis Pada praktikum ini, saya membuat sebuah Landing Page sederhana yang menampilkan informasi tentang profil diri, keahlian, proyek yang pernah dibuat, serta halaman kontak.

Website ini dibuat menggunakan HTML sebagai struktur halaman, CSS untuk mengatur tampilan dan desain, serta JavaScript untuk menambahkan interaksi pada halaman web.

Halaman yang dibuat pada website ini terdiri dari beberapa bagian yaitu:

Home : menampilkan pengenalan singkat.

About : berisi deskripsi diri dan skill.

Projects : menampilkan beberapa contoh project.

Contact : berisi form untuk menghubungi pemilik website.

Tujuan dari praktikum ini adalah untuk memahami dasar pembuatan website statis serta penggunaan HTML, CSS, dalam membangun tampilan web yang sederhana namun terstruktur.

- a. Code (boleh copy/screenshot dengan syarat terlihat jelas dan tidak blur)

Html.

```

b. Screenshot output

c. Penjelasan dari code dan output (korelasi)

Kode HTML digunakan untuk membuat **struktur dasar dari website**, seperti header, menu navigasi, bagian konten, dan form kontak.

CSS digunakan untuk **mengatur tampilan website**, seperti warna background, ukuran teks, posisi elemen, dan desain layout sehingga website terlihat lebih menarik dan rapi.

JavaScript digunakan untuk **menambahkan interaksi pada halaman web**, contohnya menampilkan notifikasi ketika form kontak dikirim.

Ketika seluruh kode dijalankan pada browser, maka akan menghasilkan sebuah **website portfolio sederhana** yang memiliki beberapa halaman seperti Home, About, Projects, dan Contact. Hal ini menunjukkan bahwa HTML, CSS, dan JavaScript dapat digunakan secara bersama-sama untuk membangun sebuah website yang interaktif dan informatif.
